

COURSE PROGRAMME

Animal Nutrition and Feed Technology

The course aims at offering an overview on the main tools and techniques to improve the quality of animal nutrition in order to guarantee animals' health and more sustainability for the environment. Participants are invited to attend the digital lessons before starting the face to face classes at University of Novi Sad.

The online module is articulated in 9 modules:

1. **COMPARATIVE ANIMAL NUTRITION** - Prof. Pinotti
2. **ANIMAL NUTRITION AND FEED INGREDIENTS** – Prof. Pinotti
3. **FEED EVALUATION** - Prof. Cheli
 - Feed evaluation
 - Energy Rich Concentrates
4. **FEED ADDITIVES** - Prof. Baldi
5. **PET FOOD TECHNOLOGIES** - Prof. Bontempo
 - Pet food technologies
6. **PIG NUTRITION**
 - Nutritional strategies to improve gut health
7. **FORMULATING DAIRY COW** - Prof. Savoini
8. **INSECTS** - Prof. Pinotti
9. **TRENDS IN MODERN AQUAFEEDS - REQUIREMENTS AND USED INGREDIENTS**
- Dr. Vojislav Banjac
10. **ALTERNATIVE PROTEIN SOURCES IN ANIMAL NUTRITION** - Dr. Olivera Duragić

In order to complete each unit, students have to watch the video-lesson, download the slides, and answer the final quiz at the end of the section.

The attempts are unlimited.

After the attendance of the online and face to face lessons, students receive a certificate.
