

ANIMAL NUTRITION AND FEED TECHNOLOGY: A CERTIFIED COURSE

PARTNERS. University of Milan (Italy) and University of Novi Sad (Serbia) join the expertise and knowledge within INNOKEP-FEED project to organize **course “Animal Nutrition and Feed Technology”** supported by Central European Initiative funds (CEI).

GOALS. The main goal of the course is to provide basic knowledge as well as competence and skills in the field of animal nutrition, feed evaluation and feed technology. The course is intended for BSc and MSc students and professionals interested in the agro-feed sector who will have the opportunity to acquire scientific and technological knowledge in animal nutrition and feed processing and improve their professional development.

PROGRAMME. The course will cover the **following topics**:

- **comparative animal nutrition**
- **feed ingredients**
- **feed formulation**
- **feed additives**
- **feed evaluation**
- **feed technology**
- **thermal processing**

ORGANIZATION. The course is divided in two parts. The first part will be focused on theoretical aspects which will be primarily focused on animal nutrition and feed formulation. It will be delivered by Virtual Learning Environment (VLE) where students can find video lessons, slideshows and self-assessment test.

The second part of the course will be organized face-to-face at Institute of Food Technology, University of Novi Sad (FINS). The course will include theoretical part addressing technological phases in contemporary feed production as well as practical part which will be held in the Pilot plant of FINS and will introduce the attendees with the equipment commonly used in a modern feed industry.
